

Expedited Hygienically Clean Certification 2020

Professional laundries seeking Hygienically Clean Certification for processing textiles in all markets can now participate in an abbreviated certification process to provide support during the COVID-19 crisis. This program is in response to the demand from customers requiring a certified Hygienically Clean laundry to provide safe textiles using proven processes and procedures, verified by third party laboratories and experienced industry consultants. This temporary program is only available for a limited time.

TRSA is offering consulting services to ensure compliance with Hygienically Clean Standards and Best Management practices to companies seeking a qualified program for certification under an expedited virtual program.

The expedited program is available for those seeking certification for various opportunities to process textiles within their existing operations. Hygienically Clean offers a defined roadmap to safely process textiles with industry wide accepted best management practices that follow verified outcomes. Hygienically Clean certification assures the customer across all markets that the laundry provider is adhering to safety processes with verified ongoing and monitored results. This also assures the laundry provider safeguards for their employees when processing laundry not normally processed within their facility. We offer a fixed fee program as well as custom consulting services to meet your company's needs.

	Pre-Audit	Program Design	Optional Services or additional time

TRSA Expedited Hygienically Clean Certification

1. Pre-Audit Evaluation – determine suitability for certification
2. Program Design and Application
 - Complete and submit TRSA Hygienically Clean Application (including payment of application fee)
 - Assign Key person(s) to complete “Producing Hygienically Clean Textiles” e-learning course.
 - Begin program development and QA manual build with consultant.
 - Conduct wash formula and finishing (drying, ironing, packaging) program review with your consultant. Precise guidance on effective programs per type of machine will be provided.
 - Collect initial samples and send to selected 3rd party lab for baseline evaluation
 - Review and adopt all OSHA compliance up to and including BBP (Blood Borne Pathogens – Universal Precautions) safety procedures, signage and training – This will include all aspects from soil sort, plant housekeeping, wash formula monitoring. Logs will be provided to monitor key areas and activities to validate compliance
 - Work with your consultant to complete your company branded QA manual and OSHA compliant training programs
 - Conduct training of key managers or local training (Production, maintenance, transportation etc.)
 - Continue sample collection and lab assessment of textile items – When 2 sets of samples pass microbiological testing, you’ve completed the e-learning course, and your critical compliance list is substantially complete your consultant will recommend you for Preliminary Certification.
3. TRSA to evaluate consultants report and issue preliminary certification under the following conditions:
 - Application and fees paid
 - Consultant’s report submitted
 - Lab report with 2 successful test cycles
 - Training completed
 - QA manual and compliance logs in use
 - Physical site inspection of QA manual, and plant systems will be scheduled when possible.
4. Since physical inspection is not possible at this time, the plant will be subject to the following Preliminary Certification requirements:
 - Test sample frequency will be monthly for first 4 months
 - TRSA can order a 3rd party to collect samples with minimum notice
5. In addition to the ongoing testing and virtual inspection, To maintain certification, every plant must agree to a physical inspection of their facility as soon as we’re able to get an inspector to your locations.
